Notes:

For externships (Field Placement Clinic) and the Semester in Practice, please contact Professor Lewis.

Law Practice Technology: Whether you practice in a large firm or as a solo practitioner, you will need to use digital tools to be competent and competitive. In this course we will learn about the various technology tools any lawyer will encounter in their practice, regardless of the size. Examples include office productivity (Word, Excel, Adobe, etc.), case management (Clio, Rocket Matter, etc.), Firm Management (Clio, Quickbooks, etc.), litigation tools (Trial Pad), generative AI (Law.ai, Harvey, etc.) and others.
